I am happy to see the fall season upon us. To all those who attended the "Annual Meetings of the Emeriti and Retirees' Association Fall Virtual Luncheon" held on Friday, September 25, 2020, I hope you enjoyed the program. Cristina Otegui did a wonderful job handling all of the details. Joan Donahue, President of the Riverside League of Women Voters was the guest speaker. Her topic was "The Suffrage Movement and the Centennial of Women's Right to Vote in the U.S." If you missed the program, a recording of the session will be available on the retirees and emeriti website in the coming weeks.

## UCR Emeriti Association Message from the President *Doug Mitchell, UCREA President*

Greetings from the UCREA President's desk!

It seems strange this fall that UCR faculty and students are going back to class without going back to school. Taking public health precautions against the COVID-19 pandemic has certainly changed the meaning of "retirement" for many of us. The UCR Emeriti Association has made significant changes in our programming to facilitate keeping the pandemic at bay. Thanks to our new virtual world via Zoom, our UCREA Executive Board continues to meet regularly, joining the UCR Retirees' Association Executive Board and the Retirement Center director, Cristina Otegui to adjust our program activities and plan new initiatives to ensure momentum and access to our members. Our web site at <https://retirees.ucr.edu/> has been updated and will increasingly serve as our communications hub.

### Virtual Event Highlights

We held our first Zoom-based "virtual luncheon" on September 25, 2020. Joan Donahue's presentation on the history of women's suffrage was outstanding!! We look forward to meeting on-line again for the December Holiday Luncheon. Using Zoom meeting software, we are launching our series of "Technology Tuesday's" which, with assistance from the UCR-IT staff, will help us all get more comfortable and secure in our use of the ever-advancing and challenging internet tools for communication, learning, establishing social relationships, and shopping. The upcoming Dickson lectures are being presented via Zoom in cooperation with UCR Extension. The lecture will be presented by Distinguished Professor Jonathon Turner, emeritus, on October 20th. His topic is: "Using Evolutionary Sociology to Discover Human Nature". (Details are in this issue of Tower Talk).

I want to give a special "Shout Out!" to Cristina Otegui who is doing a fantastic job of supporting the UCR Emeriti and Retirees' Associations. She is on top of every aspect of our programs and is a constant source of good ideas about how to strengthen our retirement communities.

Stay safe!!

### Eating Toward a Healthy Immune System - From UCLA Health

The COVID-19 pandemic has provoked anxiety and fear throughout the country and prompted many people to explore the best approaches to protecting their health. Proper nutrition is one way to help you stay healthy and strong. Eating a healthy diet helps to support a healthy immune system to fight off bacteria, viruses and many other illnesses.

Dr. Vijaya Surampudi, an assistant professor of medicine at the UCLA Center for Human Nutrition, shares some tips for how best to feed the body. "An ounce of prevention produces a pound of cure," says Dr. Surampudi. "How you feed your body on a daily basis pays off in a lifetime."

#### Nourish your body

Wisely choosing the foods you eat will help to support your body's defense mechanisms.

Focus on:

- Increasing your intake of vegetables
- Not drinking sugar-sweetened beverages
- Limiting the amount of red meats eaten
- Including healthy spices like cinnamon, oregano, turmeric and more
- Eating whole grains
- Incorporating healthy fats like avocado and olive oil

#### Focus on micronutrients

- **Vitamin A** helps regulate the immune system and protects against infections by keeping skin and tissues in the mouth, stomach, intestines and respiratory system healthy. Get this vitamin from such foods as sweet potatoes, carrots, broccoli, spinach, red bell peppers, apricots, eggs or foods labeled "vitamin A fortified" such as milk or some cereals.
- **Vitamin C** supports the immune system by stimulating the formation of antibodies. Reach for citrus fruits such as oranges, grapefruit and tangerines, or papaya, strawberries, red bell pepper or tomato juice.
- **Zinc** supports the immune system and may help wounds heal. Zinc can be found in lean meats, poultry, seafood, milk, whole grain products, beans, seeds and nuts.

## Did You Know? Health and Wellness

### Eating Toward a Healthy Immune System (Continued)

#### Create consistency

One of the ways you can develop a rhythm of eating healthy is by “coloring your plate.” The more colorful your plate, the greater variety of nutrition you are getting.

#### Blue:

- Promotes healthy aging.
- Lowers the risk of some cancers.
- Improves urinary tract health, memory function and heart health.
- Reach for blueberries, blackberries, elderberries and more.

#### Orange:

- Maintains heart, vision and immune system health.
- Reach for pumpkin, sweet potato, carrots, winter squash, cantaloupe, apricots and more.

#### Red:

- Promotes memory function and urinary tract health.
- Maintains a healthy heart.
- Lowers risks of some cancers.
- Reach for tomatoes, pink grapefruit, red peppers, watermelon and more.

#### Green:

- Lowers risk of some cancers and heart disease, maintains vision health and protects against birth defects in pregnant women.
- Keeps blood cells, bones and teeth strong.
- Reach for collard greens, kale, spinach, broccoli, brussels sprouts, lettuces and artichokes.

#### Avoid supplements

If you are eating a balanced diet, there is no need for supplements. Supplements are not packaged the same way as food, so we do not know what else is needed for adequate absorption and utilization by the body.

#### Building immunity is multilayered

Every part of your body, including your immune system, functions better when protected from environmental assaults and is improved by healthy living strategies, such as:

- Not smoking
- Eating a diet abundant with fruits and veggies
- Exercising regularly
- Getting adequate sleep
- Taking steps to avoid infection such as washing your hands
- Maintaining a healthy weight
